Survey Title: Geo-social survey for Urban Lifestyle Preferences (GULP)(Metro survey), 2020 [Restricted Data]

Depositor: Hanibuchi Tomoya

*When you publish research outputs using this data, please acknowledge the source by citing as follows:

The data for this secondary analysis, "Geo-social survey for Urban Lifestyle Preferences (GULP)(Metro survey), 2020 [Restricted Data] " (Hanibuchi Tomoya), was provided by the Social Science Japan Data Archive, Center for Social Research and Data Archives, Institute of Social Science, The University of Tokyo.

Please note that this questionnaire was used in the Postal Survey. It does not mimic the screen used in the Web Survey (i.e., the Metro Survey and the Nonmetro Survey). In the web-based surveys,

- the survey content was the same, but the layout differed for each method,
- the values for SQ6 were obtained by operating a slider, not by entering numerical values,
- questions SQ8, SQ9, and B6(2) were asked differently. However, please note that the responses to those questions (i.e., information about residential addresses and places of birth) are not included in the publicly available data.

【For all respondents】

SQ1 Please select "Agree" if you understand the above explanation (pages 1 and 2) and agree with the purpose of this survey; otherwise, select "Disagree".

SQ8 Would you be willing to allow us to use **"Postal code" and "address (down to the house number)" of your residence** for geographical analysis? (Circle only one)

· In the case of an apartment complex, the name of the apartment and the room number will not be used for geographical analysis.

【Reason for asking to use your "postal code" and "address (house number)"]

This questionnaire asks to use your postal code and address for geographic data analysis. For an accurate analysis, we ask for your address down to the "house number level". In the analysis, the address will be converted into numerical indicators such as the degree of urbanization and distance to parks and hospitals. The data will be processed statistically and will never be made public in a personally identifiable format.

- | | |
|--------------------------|--|
| 1. Consent to use | → please go to Q1 on the subsequent pages |
| 2. Do not consent to use | → please go to SQ9 on the subsequent pages |

【For those who do not agree to the use of their postal code and address (answered "2" in SQ8)】

SQ9 Then, would you allow us to use only your "postal code" for geographic analysis?
(circle only one)

【Reason for asking to use your "postal code"】

This questionnaire asks to use your postal code for geographic data analysis.

In the analysis, the postal code will be converted into numerical indicators such as the degree of urbanization and distance to parks and hospitals. The data will be processed statistically and will never be made public in a personally identifiable format.

<p>1. Consent to use</p> <p style="text-align: center;">↓ Please proceed to Q1</p>	<p>2.
